AZALEAS, CAMELLIAS

EVERGREENS AND FLOWERING SHRUBS

THOMASVILLE NURSERIES, Inc.

" Home of Roses "

Thomasville

Georgia

FOREWORD

Pursuant to a desire to give our customers the very lowest prices possible, we have cut every cost we could, except that required in growing the very best stock possible. One of the costs we cut, in order to lower prices, is in catalogue outlay. Whereas for eleven consecutive years we have issued an attractive catalogue with many illustrations, largely in color, this season we are printing only descriptions and prices. Perhaps 90 per cent of those who receive this season's catalogue have kept in their possession one or more of our illustrated booklets, therefore we feel justified in issuing only a descriptive booklet now.

In looking through this catalogue you will observe that many prices have been substantially reduced. The only way we can possibly continue such prices throughout the season will be on the basis of a large volume of business. We believe, however, that many people are going to take advantage of the low prices, remembering that we grow the best quality and ship stock that is true to name.

We wish to assure old and new customers that every care will be steadily given toward digging, packing and prompt delivery, and that the highest quality is steadily maintained. We cannot too strongly emphasize the advisability of ordering early, thereby being assured of orders being filled completely with the first choice of the stock.

For the liberal patronage of the past which has built our business we are deeply grateful, and we solicit a continuance of these favors, pledging our best efforts toward taking the best care of the business entrusted to us.

THOMASVILLE NURSERIES, INC.

S. C. Hjort, President.

Thomasville, Ga.,
Oct. 1, 1932.

TERMS OF BUSINESS

Location.—Main nursery office, lathhouses and trial grounds at intersection of Boston and Summerhill roads with Boulevard, two miles east of Thomasville. Roses, conifer and fruit tree nursery on Boston road, three miles east of Thomasville. The Thomasville-Boston road is a link of the Lone Star Trail from Los Angeles to St. Augustine, and is also known as Georgia State Road No. 38.

Invitation to Visitors.—Visitors are welcome at our place every day in the year. We transact no business on Sundays, but leave our gates open for visitors to see the Azaleas, Roses, etc. A visit to the nurseries is not an obligation to purchase.

Terms.—Cash with order or satisfactory references, except to parties of known responsibility.

Transportation at Purchaser's Risk.—All transportation expenses are to be paid by the purchaser; our responsibility ceases upon delivery, in good order to forwarding companies.

Substitution.—We do not substitute unless so authorized. It is well, as the season advances, to name substitute to be used in the event of shortage.

Inspection.—Our nurseries were inspected by C. H. Gaddis, Albany, Ga., a representative of M. S. Yoemans, State Entomologist, Atlanta, Ga., July, 1932, and a certificate to this effect, and that plants are fumigated as required by law, accompanies every shipment, and we comply with the various laws of the states into which we ship. We offer no balled plants grown on nut grass lands.

Claims.—If, by any possibility, errors should occur, they will be promptly rectified, if claim is made within ten days after receipt of the goods.

Guarantee.—We cannot control conditions after plants leave our hands, and we cannot, therefore, guarantee our plants to live. We do guarantee all stock sent out to be well rooted, true to name, properly packed and shipped according to instructions.

Quantity Rates.—Forty or more plants at the 100 rate, 300 or more at the 100 rate.

Order Early.—We cannot too strongly urge the advisability of ordering early. In so doing, one gets the assortment and pick of the stock and avoids disappointment of possible failure to get order filled complete. Orders may be sent early and stock reserved for later delivery.

About Ourselves.—Thomasville Nurseries, Inc., is owned by S. C. Hjort, E. K. James and Thomas E. Hallam, none other are financially interested, and there is no connection with any other nursery concern.

Address all communications and make remittances payable to Thomasville Nurseries, Inc., Thomasville, Ga.

Special Discount to Garden Clubs

20 per cent. discount will be given from the catalogue figures to members of Garden Clubs buying collectively through their organizations, on orders of \$25.00 or more. Collective buying effects a large saving, as in addition to the 20 per cent. discount, in this immediate territory we can usually deliver substantial order by truck, thereby saving the purchaser the transportation charges. If we are furnished a list of the purchasers and plants for each, we will wrap each order separately, to effect easy distribution on delivery.

Camellias

This is the delightful Winter flowering shrub or small tree commonly called "japonica," and is a great favorite in the gardens of the Lower South. Up to the time Quarantine No 37, shutting off plant importations, went into effect, practically all of the Camellias planted in this country were imported. For some years there has resulted a great scarcity of Camellias, especially of the finer varieties.

For the past five years we have been diligently collecting Camellias from many sources, and have developed a fine lot of varieties. Some of these we have under correct name. Other varieties were secured from sources where it was impossible to get the names, and these we have labeled by color description accurately.

All of our Camellias are pot grown, and are taken from pots with a firm clump of soil about the roots, which insures the maximum safety in transplanting. The quality of these plants is not to be compared with "layered" plants, most of which are usually poorly rooted. Our Camellias all have a vigorous, well developed root system.

DESCRIPTION OF VARIETIES—Group 1

- Alba plena. Full, double flower, pure white, wax-like, very regular and very double. While difficult to propagate and slow of growth, when fully developed is the best double white. Early.
- Carrination. Peonyform, bright red, fluted petals, fluffy center. Also known as Christmas Glory. Early.
- Chandleri elegans. Semi-double pink with large white splotches; large flowers. Can only supply two smaller sizes.
- Gloire de Nantes. Flowers very large, semi-double, deep pink, showy stamens in center.
- Haley's Monarch. Large, semi-double deep red, with stamens mixed in petals.
- Mathotiana alba. Large, double, pure white; mid-season.
- Nobilissima. A rare and fancy white; semi-double, showy yellow stamens. Can only supply the two smaller sizes.
- Otome. Bright, shell pink, waxy flowers, free-flowering from January to March. Various growers also list this variety as Chalmer's Perfection and Pink Perfection.
- Prof. Sargeant. Peonyform, deep rich crimson. Can only supply the smaller sizes.
- Camellia A. Large, semi-double red and white variegated, with stamens in center.
- Camellia B. Large, semi-double pink and white variegated, with stamens in center.
- Camellia C. Large, semi-double deep pink, with stamens in center.
- Camellia D. Large, semi-double dark red, with stamens in center.
- Camellia E. Large, semi-double deep pink, with stamens mixed in petals.
- Camellia F. Large, semi-double deep red, with stamens mixed in petals.

Prices of Camellias—Group 1

We have in limited supply many other varieties of rare and fancy Camellias. If there is a particular variety you wish and not listed here, please write us.

Book: AZALEAS AND CAMELLIAS
By H. HAROLD HUME

A valuable new book of practical information dealing with these beautiful, increasingly popular and distinctively Southern shrubs. Thoroughly describes varieties best suited for various uses and discusses questions of culture, such as soils, fertilization, and general care. 98 pages. Cloth. \$1.50.

DESCRIPTION OF VARIETIES—Group 2

- Dixie.** Double deep pink, free bloomer. Believed to be identical with variety called by some growers, Rosita.
- Imbricata.** Large, double dark red, occasional white spot. Very heavy, dark green foilage.
- Lady Campbell.** Deep rose to light red, full and double. One of the most prolific of all double flowering Camellias; all flowers develop well. One of the fastest growing bushes; very hardy.
- Sarah Frost.** Rosy crimson, very double, free flowering, midseason bloomer, very handsome. The most widely cultivated of the double flowering Camellias, having proven the most satisfactory.
- Tricolor.** Showiest of all the single flowering kinds; red pink and white flowers on same bush. Fast grower and free bloomer.
- Camellia M.** Double magenta pink, free bloomer, midseason bloomer, medium flower.
- Camellia N.** Double rose pink, splotted with white. One of the most prolific of all the Camellias, and is our best double variegated variety. Fastest grower of all of our double flowering Camellias.
- Camellia O.** Double deep red, large and full flower. Two large bushes of this kind at the grounds of Mrs. Louise Rouse, Meigs, Ga., are about the finest double red Camellias in this section.
- Camellia P.** Double deep pink, large and full. In color about half way between Otome and Dixie, and size of the latter.
- Camellia Q.** Double red and white; one of the most beautiful of the double flowering Camellias.

We have in limited supply about forty varieties not described in this catalog, which we will be glad to show those who come to the nursery. If you cannot come to the nursery, and there is a variety not listed here you wish, please write us, describing the flower; probably we can supply plants. If at flowering time, send us a flower for comparison.

Prices of Camellias—Group 2		Each	12
6 to 8 in., from pots.....		\$0.50	\$5.00
8 to 12 in., from pots.....		.75	7.50
12 to 18 in., from pots.....		1.00	10.00
18 to 24 in., from pots.....		2.00	20.00

Special Collection 6 Double-Flowering Camellias

1 Pink	1 Bright Red	1 Red and White Var.
1 Deep Red	1 Pink and White Var.	1 White
8 to 12 in.....regular value		\$3.75
Special 6 Collection, price		\$3.00
12 to 18 in.....regular value		\$5.00
Special 6 Collection, price		\$4.00
18 to 24 in.....regular value		\$10.00
Special 6 Collection, price		\$7.50

All of these Camellias are double, free flowering, dependable varieties, our selection, well grown, and not to be compared with inferior plants. They are pot grown; each plant carries a clump of soil, making transplanting safe. We believe our special Camellia collections are the best on the market.

Special Collection 6 Rare and Fancy Camellias

1 semi dbl. Red	1 Semi-dbl. Red and White	1 Red Peonyform
1 Semi dbl. Pink	1 Semi-dbl. Pink and White	1 Pink Peonyform
8 to 12 in.....regular value		\$5.00
Special 6 Collection, price		\$4.00
12 to 18 in.....regular value		\$10.00
Special 6 Collection, price		\$7.50

These Camellias are all beautiful varieties, our selection, no common varieties in this lot. Semi-double kinds have showy yellow stamens in center of flowers, while Peonyform varieties have stamens mixed in the petals. This collection of rare and fancy Camellias is one that will be prized by any gardener.

INDICA AZALEAS

The Indica Azaleas are the most attractive of Winter flowering shrubs in the South. Their value in landscape uses is too little recognized, for evergreen Azaleas are indispensable in Southern landscape effects. Varieties of *Azalea indica*, coming into flower when so little else is in bloom, are a mass of beauty on the private estates of Northern Winter residents of Thomasville in the late Winter and early Spring, and no one who has seen these plantings will ever forget the scene. The famous Magnolia Gardens near Charleston, S. C., where many varieties of Azaleas are seen by throngs of visitors every Spring, has been said to be the loveliest spot in America.

Azaleas, contrary to general belief, are by no means hard to grow. They thrive in rather acid soil, leafmold or pond muck, with little or no manure, but, being surface feeders, they like a good mulch of leaves and Pine straw and should not be allowed to suffer for want of water. They should be planted in partly shaded situations. Clay, lime, and an excess of potash should be avoided. When Azaleas are well grown they are among the most delightful and satisfactory plants in existence. The flowers last in perfect condition a long time, and the wonderful color effects are rarely approached by any class of plants.

There is a prejudice in some quarters against the purplish pink, or cerise, varieties, but this shows a lack of the proper appreciation of values in color effects. What could be more delightful than a combination of *Azalea formosa* and *Spiraea reevesiana flore pleno* as a foreground to a piece of Pine woods? To extend the blooming season, *Azalea phoenicia* and *Azalea omurasaki* could be used, as they are at their best when *Azalea formosa* is about through.

Owing to the high color effect of these Azaleas, it is not always wise to use them together with reds or clear pinks, as the colors disagree, but with white or yellow flowering shrubs, the combination is delightful. Another feature in favor of the purplish pink Azaleas is that they are often successful under unfavorable conditions where other varieties would barely exist. Azaleas often vary in color in different localities. Nurserymen grade by spread as well as height.

The Rhododendrons, which are used so largely in landscape effects farther north, are worthless here except in high altitudes. Their place is filled by the evergreen Azaleas, which have all the colors of the Rhododendrons, and several besides.

All the Azaleas we list are evergreen.

Prices of All Named Indica Azaleas		Each	12	100
6 to 8 in.		\$0.25	\$2.50	\$20.00
8 to 12 in.		.50	5.00	40.00

Visit Hjort's Azalea Woodland

March is the month of Azaleas, at which time the midseason varieties are at their height, and these contain the greatest range of color and form. In March we are glad to have visitors come on Sunday afternoons and enjoy with us the wonderful display of *Azalea* bloom at Hjort's Azalea Woodland, two miles east of Thomasville on the paved State Road No. 38.

Enlarged and ample parking facilities are provided and conveniently placed signs guide you easily through the Azalea plantings. Most of the main roads into Thomasville are paved, and visitors from many cities in this section have found it a delightful Sunday afternoon trip to drive over to Thomasville and see the Azaleas at Hjort's Azalea Woodland.

Absolutely no admission charge or collections taken and nobody is asked to buy. This is the greatest display of *Azalea* color and varieties in this section. Come and enjoy it with us.

Leading Varieties Indica Azaleas Described

- Alba.** Large, single flowers. A very hardy kind; while it flourishes in the South, is used extensively in the North. Used a lot about Thomasville. Tall grower, midseason bloomer.
- Anthonon.** White to pale pink, with rose pink center. An extremely late bloomer, therefore excellent for extending the Azalea flowering season. Makes an attractive, compact bush.
- Croemina.** Very large, shell pink, closely related to Elegans, but flower of greater size and bush is more spreading. One of the most beautiful of all the Azaleas. Early.
- Coccinea major.** A tall growing scarlet Azalea of great merit, one of our best varieties. Midseason.
- Duke of Wellington.** Flowers rosy salmon with dark center, medium grower, midseason bloomer.
- Duc de Rohan.** Flowers salmon pink, of medium size, very free flowering; early. Of medium growth.
- Dixie.** This salmon red variety is one of the finest of all the Azaleas. An early bloomer, tall grower, compact bush, prolific in flowering.
- Elegans.** One of the best of the early flowering Azaleas. Flowers of medium size, light to rose pink, strong, rather open and tall grower. A great favorite wherever known. Visitors to our nurseries buy more of this variety than any other.
- Flame.** Same as President Clayes.
- Fielder's White.** Large, pure white flowers, opening early.
- Formosa.** A robust, strong growing Azalea, with good foliage and large, rosy purple flowers, freely produced. It is a very hardy Azalea, one of the easiest to grow. Generally considered the greatest of all the Azaleas.
- George Frank.** Flowers of large size, rose pink with darker blotch on upper petal. Makes a medium size bush. One of the earliest bloomers.
- Glory of Sunninghill.** A late bloomer of vermilion red color, bush is a compact grower with very dark foliage. One of our best red Azaleas.
- Iveryana.** One of the finest variegated Azaleas. Flowers large, white with rose pink, sometimes orange, stripes. Midseason.
- Prince of Orange.** An orange scarlet late bloomer, compact grower.
- Phoenecia.** Resembles Formosa, except leaves more narrow. A very fine, hardy sort, with rosy lilac or lavender flowers. Of all the Azaleas, it stands the most sun. By giving a heavy mulch, this variety may be planted in full sun.
- President Clayes.** This flame colored Azalea is one of the most popular of the better Azaleas used at Thomasville. Free bloomer, tall and fast grower. Midseason.
- Royal Red.** The finest of all the late red Azaleas with us. This variety was gotten from Japan years ago without a name, and after years of failure to get its name, we have given it one. A tall grower, compact bush, free bloomer.
- Venus.** A small to medium growing bush, flowers medium in size, white, occasionally with pink stripe; compact grower, good foliage.
- Violacea rubra.** Dark violet purple flowers with wavy petals. A strong growing variety, midseason bloomer, plant has dark green foliage. One cannot plant a better and more dependable Azalea.
- Vittata fortunei.** A strong, open grower, blooming in South Georgia, from October to March. Flowers very variable; mostly white with faint lavender stripes. Sometimes a bush may produce only white, or only lavender, or the blooms may be mixed on one plant. Valuable for its long flowering season.
- William Bull.** The one double flowering Indica Azalea we list. An open branched, picturesque grower, producing small, double pomegranate red flowers in profusion rather late in the Azalea season.

AZALEA amoena. A Japanese Azalea perfectly adapted to the South, but used extensively in the North on account of its great hardiness. A tall grower, producing small, claret red flowers in great abundance over a long period.

Special Collection 12 Indica Azaleas

1 Shell Pink	1 Salmon Pink	1 Orange Red	1 White
1 Rose Pink	1 Scarlet Red	1 Salmon Red	1 Purple
1 Magenta Pink	1 Brick Red	1 Variegated	1 Flame

8 to 12 in., stocky.....regular value \$5.00
Special Dozen Collection, price \$4.00

12 to 15 in., stocky.....regular value \$7.50
Special Dozen Collection, price \$6.00

15 to 18 in., stock.....regular value \$10.00
Special Dozen Collection, price \$8.00

18 to 24 in., stocky.....regular value \$15.00
Special Dozen Collection, price \$12.00

All of these azaleas are choice varieties, our selection. Every plant is well set with flower buds. If you want only a half dozen Azaleas, you may select 6 of the above color, at the following special half dozen prices: 6 plants, 8 to 12 in. for \$2.25; 6 plants 12 to 15 in. for \$3.50; 6 plants, 15 to 18 in. for \$4.50; 6 plants, 18 to 24 in. for \$6.50. These special collection prices are unusual value; we do not believe you can find as good plants and wide assortment elsewhere without paying more.

Kurume Azaleas

Within the past few years a wonderful new race of Azaleas, the Kurumes, has been introduced in America. Mr. E. H. Wilson, an eminent authority says in his "Monograph of Azaleas:" "To my mind, the Kurumes are the loveliest of all the Azaleas. The colors are so pure and exquisite, and of every hue and shade from white, pink and salmon to scarlet, crimson and the richest magenta. The hose-in-hose forms have none of the ugly features of double flowers, but, on the contrary, are singularly attractive, and last much longer. They are extremely floriferous, and in season the blossoms often completely hide the leaves."

Visitors to our Azalea woodland the past several years have been greatly impressed with the striking beauty of a planting of Kurume Azaleas, set ten years ago, and now large bushes. We are describing 16 varieties of these charming Azaleas in this catalog, and in limited supply we have a dozen others.

The Kurumes, being Japanese Azaleas, native so much farther north than the Indicas, which are mostly Chinese and Indian, are much the hardier of Azaleas. While perfectly adapted to planting in the lower South where Indicas are being used, they withstand the more severe climate of Atlanta, northward to Kentucky, across to New Jersey and Long Island.

The first of the Kurumes planted in America were dwarf varieties, and it is generally believed all Kurumes are small growers, which is not true. In the Kurumes we grow now are some medium and tall growers. These plants are slower of growth than Indicas, which accounts for the difference in price, but ultimately they are the most prized of the Azaleas. Often Indica Azaleas are used in a background with Kurumes of harmonizing colors fronting them.

Prices of all Kurume Azaleas		Each	12
6 to 8 in.....		\$0.50	\$5.00
8 to 10 in.....		.75	7.50
10 to 12 in.....		1.00	10.00
12 to 15 in.....		1.50	15.00
15 to 18 in.....		2.00	20.00

Larger specimen plants \$3.50 to \$40.00 each.

In limited quantity, we have Azaleas not listed in this catalog. Visit the Azalea grounds if possible, and select for yourself. In our wide assortment of Azaleas are many new and better kinds.

If you cannot visit the nursery, write and tell us how much space you have, kind of location and color of bloom desired, and we will, without cost, submit an Azalea sketch, blending colors and types. By using early, mid-season and late varieties, you may have four months of Azalea bloom.

Varieties of Kurume Azaleas Described

The hose-in-hose varieties are marked thus *; all other varieties are single.

***Apple Blossom.** Very light pink, blooms just a few days earlier than Cherry Blossom; flowers rather large for a Kurume. Tall.

***Cattleya.** White, tinted with lilac, shading at the edges to mauve pink. The latest of all the Kurumes to bloom at Thomasville. Medium.

***Coral Bells.** Beautiful shell pink, shading somewhat deeper at center. Free flowering and dainty. The most dwarf of the dwarfs, ultimate height 2½ ft. An early bloomer.

***Christmas Cheer.** Brilliant bright red, the small foliage is very dark green and compact. The earliest of the red Kurumes. Medium.

***Cherry Blossom.** A favorite of the tall growers. Very light pink, somewhat late in flowering.

***Carmine Prince.** Flowers rather large for a Kurume, carmine red, somewhat late in flowering; medium and compact grower.

***Hortensia.** One of the taller growers of the pink Kurumes. Midseason bloomer.

Flame. This flame Azalea is one of the best of the Kurumes and one of the tallest growers. Midseason.

Hinodegiri. Flowers brilliant scarlet, foliage rounded and deep green. A midseason bloomer, coming into flower just before Christmas Cheer is through. Medium.

Hinamayo. Flowers beautiful rose pink, foliage small, profuse bloomer. Often used as a background planting for Coral Bells. Tall grower, early bloomer.

Lavender Queen. A Kurume often used to edge the Indica Azaleas Phoenecia or Formosa. Flowers late like these Indicas. Medium grower.

Orange Beauty. This Azalea of tangerine orange color is the earliest of the Kurumes to flower at Thomasville. Growth about identical with that of Coral Bells.

***Pink Pearl.** Flowers light pink, produced in dense clusters; midseason bloomer; tall grower.

Peachblow. A fine Kurume Azalea with flowers of a light shade of peach blossom pink. Tall grower; one of the fastest of the Kurumes; midseason bloomer.

Salmon Queen. This salmon colored Kurume Azalea is one of the best of the single flowering kinds. Midseason bloomer, medium grower.

***Snow.** The best of the White Kurumes. Midseason bloomer; medium grower.

Perfectly Hardy, You Can Depend on Kurume Azaleas

The Kurume Azaleas, being native of Japan, fully 1000 miles further north than that native habitat of the Indicas, are by long odds the hardiest of the Azaleas. The Kurumes thrive under the same planting conditions as Indicas. In March, 1932, when Indica Azaleas were damaged by a severe freeze, the Kurumes were unhurt.

Do not think of Kurume Azaleas as being dwarf. The first ones introduced were dwarf for pot culture, but now we have varieties like Flame, Hinamayo, Cherry Blossom, Vesuvius, etc., which often grow eight feet tall.

Now that we have developed a large and fine stock of these delightful and dependable Azaleas and greatly reduced the prices, more of them should be planted.

BUILD ROCK GARDENS, POOLS, ETC.

Our Landscape Department builds rock gardens, pools, lawns, etc. and does grading, pruning and spraying, and will supply garden furniture and irrigation equipment. We like to do as much of this service work in the Summer as possible.

BROAD-LEAVED EVERGREENS

ABELIA grandiflora. This useful evergreen with dark green leaves and white flowers is too well known to need minute description.

	Each	12	100
12 to 18 in., strong, from open ground.....	\$0.25	\$2.50	\$20.00
18 to 24 in., strong, from open ground.....	.35	3.50	30.00
2 to 3 ft., strong, from open ground.....	.50	5.00	40.00

ELAEAGNUS pungens. An evergreen of spreading growth, leaves glabrous above and silvery white underneath, often dotted with brown flecks. Bears quantities of bright red fruits, and is a useful evergreen for the South.

	Each	12
18 to 24 in.....	\$1.50	\$15.00
2 to 3 ft.....	2.50

EUONYMUS patens. A very attractive member of the Euonymus family, with glossy green leaves and bright red berries.

8 to 12 in.....	\$0.35	\$3.50
12 to 18 in.....	.50	5.00

NANDINA domestica (Japanese Nandina). A very showy evergreen or nearly evergreen shrub. In Winter its leaves turn a bright red and hang on the plant until early Spring, which, with the bright red berries, makes it a conspicuously attractive specimen plant. Easily the most useful of all berried evergreens for this section. We recommend it highly, it can be used in shady or sunny locations.

6 to 8 in.....	\$0.25	\$2.50	\$20.00	15 to 18 in.....	\$0.75	\$7.50	\$60.00
8 to 12 in.....	.35	3.50	30.00	18 to 24 in.....	1.00	10.00	90.00
12 to 15 in.....	.50	5.00	40.00	2 to 3 ft.....	1.50	15.00	125.00
Extra stocky Nandinas, \$2.00 to \$5.00 each.							

MAGNOLIA grandiflora (Evergreen or Southern Magnolia) The most prized native evergreen tree. It is valuable for lawns, specimens, avenue plantings or for shade. 2 to 3 ft., \$0.50 each, \$5.00 per 12; 3 to 4 ft., \$1.00 each, \$10.00 per 12.

OLEANDER (Nerium Oleander). One of the finest evergreens for specimen or mass plantings, and popular in South Georgia, the Gulf Coast and Florida. It is not adapted to colder climate. We have selected hardy varieties, and offer single and double of pink, white, and red. We especially recommend the double pink, a fragrant variety and thrifty grower. \$0.50 each, \$5.00 per 12, \$40.00 per 100.

OSMANTHUS fragrans (Tea or Sweet Olive). Small white flowers produced in clusters, which emit a pleasing fragrance. In the lower South plant is in bloom the greater part of the year.

	Each	12
8 to 10 in.....	\$0.50	\$5.00
10 to 12 in.....	.75	7.50
12 to 15 in.....	1.00	10.00

PITTOSPORUM tobira. An excellent shrub, very popular and extensively used in the South, having dark green leaves clustered at the ends of branches. The plant is of compact growth, flowers yellowish white, very fragrant, appearing in early Spring. The Pittosporum may be used in foundation planting, massing, trimmed as a specimen or as a dense hedge. Ours are stocky plants. Too much cannot be said in favor of this evergreen, for in its many uses it is greatly prized in landscape plantings, and we always advise its planting.

	Each	12	100
8 to 12 in.....	\$0.50	\$5.00	\$40.00
12 to 15 in.....	.75	7.50	60.00
15 to 18 in.....	1.00	10.00	80.00

PITTOSPORUM tobira variegata. A beautiful form of Pittosporum with leaves silver margined. Does not grow as tall as the green leaf variety, but is of the same characteristic spreading habit.
Same prices as Pittosporum tobira.

PHOTINIA serrulata. Large evergreen shrub or small tree. The new growth is reddish, turning to dark green, and foliage is densely serrate. Flowers white, in large corymbs in early Spring.

	Each	12		
12 to 18 in.....	\$0.75	\$ 7.50		
18 to 24 in.....	1.25	12.50		

PYRACANTHA crenulata yunnaniensis (Chinese Hawthorn). An excellent Hawthorn of broad, spreading habit, bearing a profusion of white flowers in the Spring and coral red berries which mature in the Fall and hold through Winter. Same prices as *Pyracantha lalandi*.

PYRACANTHA coccinea lalandi (Laland's Firethorn). One of the showiest of all evergreens, particularly attractive in Winter when loaded with orange-red berries.

The Evergreen Ligustrums

LIGUSTRUM iwata. A comparatively new and scarce evergreen Privet of great merit. Glossy, green foliage, with lighter center; densely compact grower.

LIGUSTRUM lucidum (The Wax Privet.) Dark, glossy foliage, very compact grower. Like the other evergreen Ligustrums we grow, our *Lucidum* is a select, uniform strain of great beauty.

LIGUSTRUM nepalense. An evergreen Privet of dark green foliage, and, like other Ligustrums, has dense heads of black berries in Fall and Winter.

LIGUSTRUM excelsum superbum. A beautiful evergreen Privet of golden and white variegated leaf; tall grower.

LIGUSTRUM japonicum. This is the tall growing Ligustrum with solid green leaf.

LIGUSTRUM marginatum aureum. The gold leaf Privet, a tall grower and valuable evergreen.

LIGUSTRUM noblis. Leaf dark green and glossy like *Lucidum*, except more pointed. An upright grower, in habit between *Lucidum* and *Japonicum*. Often called *Lucidum pyramidalis*.

Prices of the Above 7 Ligustrums

The Evergreen Viburnums

VIBURNUM macrophyllum. A valuable evergreen destined to be used more extensively in the South, because of its lustrous, dark green foliage, compact habit and resistance to disease. Ultimate height, 6 to 8 ft.

VERBURNUM odoratissimum. A valuable evergreen in mass or specimen planting. Large green leaves, and showy heads of white flowers in the Spring. Growth about like *Macrophyllum*.

VIBURNUM tinus. An evergreen of great value as a Winter flowering tree. Creamy white flowers in great clusters in February. More upright in growth than other Viburnums, leaves smaller, but dark green.

Prices of above 3 Viburnums

TRACHYCARPUS excelsa (Windmill Palm). A graceful and very ornamental variety growing to a height of between 12 and 15 feet. Withstands intense cold without being injured.

	Each	12
1 to 1½ feet.....	\$0.75	\$ 7.50
1½ to 2 feet.....	1.00	10.00

We have a limited stock of Phoenix canariensis, Washingtonia robusta and Cycas revoluta. Correspondence is invited.

Attention Farmers!

We will trade fruit trees and ornamental plants, anything from our catalogue, for farm produce. We can use corn, hay, syrup, potatoes, meat, etc., at market prices.

Regular Truck Deliveries

To better serve our customers, during the active planting season we can practically assure free delivery by truck on orders of \$10.00 or more (smaller orders are usually shipped by express or parcel post collect) to the following points:

Albany, Americus, Bainbridge, Columbus, Cuthbert, Dawson, Lake City, Madison, Perry, Quincy, Sylvester, Tallahassee, Tifton, Valdosta and intermediate points along the main thoroughfares of these cities.

In addition to these weekly deliveries, frequent irregular loads are made to many points off the principal roads in South Georgia and Southeast Alabama. Occasional trips carry our trucks as far as Atlanta, Savannah, Jacksonville and Mobile. To fully protect plants, trucks are canvas covered.

The prices in our catalogue ought to appeal to the buyer of plants. We've got a fine lot of plants, and ample facilities for getting them delivered.

CONIFEROUS EVERGREENS

CEDRUS deodara. For many years in Southern gardens this tree has stood out as the handsomest of all the conifers. Bright, bluish green foliage, tree grows up cone-shaped, with graceful, lateral branches.

CUNNINGHAMIA lanceolata (sinesis). One of the aristocrats among coniferous evergreens, shaping up like the well known Deodar Cedar. The foliage is of the darkest green, pine like, and very compact. Cunninghamias in Georgia and Florida have stood all extremes of temperature perfectly. 18 to 24 in. size only.

CUPRESSUS sempervirens pyramidalis (Italian Cypress). Densely compact foliage of dark green, tree very slender, fills an important place in landscape plantings.

JUNIPERUS japonica sylvestris. We are decidedly pleased with this Juniper after watching it in landscape plantings the past few years. It is one of the most graceful of all the conifers, growing somewhat on the order of Virginiana glauca, but of dark green and feathery foliage.

THUJA aurea conspicua (The Goldspire Arbovitae.) The most beautiful of all the taller golden-foliaged conifers. Ours is a select type, cutting grown, run uniform in growth and color, and far superior to seedlings sent out by many growers and peddlers.

THUJA orientalis compacta. A compact and almost rounded coniferous evergreen of bright green foliage. Admirably adapted to Southern plantings.

THUJA orientalis compacta pyramidalis. A development from the above of pyramidal and compact growth.

THUJA orientalis, Rosedale Hybrid (Biota Blue-green). A Rosedale Arborvitae of loose and open foliage, not so susceptible to burning out inside as was the old Biota Rosedale. Beautiful, bluish green foliage.

Prices of Cedrus, Cunninghamia, Cupressus, Juniperus Sylvestris and Thujas:

	Each	12
12 to 15 in.....	\$0.50	\$5.00
15 to 18 in.....	1.00	10.00
18 to 24 in.....	1.50	15.00
2 to 3 ft.....	2.00	20.00
3 to 4 ft.....	3.00

CHAMAECYPARIS. Showy coniferous evergreens of plummy foliage. We can supply chamaecyparis plumosa (green); C. aurea (golden); C. veitchi (blue), and C. ericoides (green pyramidal).

JUNIPERUS pfitzeriana. Long recognized as the leading spreading or prostrate Juniper in this section. Its foliage of bluish green color does not brown by coldest weather. It is the best spreading Juniper for this section.

JUNIPERUS stricta. A conifer that is coming rapidly into favor in this section as it becomes better known. Bright blue green foliage, tree shapes up somewhat cone-like, but is compact, however not so dense as to burn out.

Prices of Chamaecyparis, Juniperus pfitzeriana and J. stricta:

VINES

Prices on Vines

	Each	12
Medium plants.....	\$0.25	\$2.50
Strong plants.....	.50	5.00
Extra strong plants.....	.75	7.50

Except where noted

- EUONYMUS radicans** (Wintercreeper). A trailing evergreen of rapid growth. Fine for covering walls and stumps; good ground-covering for shady places.
- FICUS repens.** An evergreen climber with small, bright green leaves. An excellent plant for completely covering and screening brick walls, posts, rockwork, etc.
- HEDERA algeriensis** (Algerian Ivy). Large showy leaves, vine clings to any surface fine for climbing pine trees, or for making ground cover. 30c. each, \$3.00 for 12.
- HEDERA helix** (English Ivy). Shiny, evergreen leaves, clings to any surface without support. Extensively used in covering trunks of trees and in trailing from window boxes. 20c. each, \$2.00 per 12, \$15.00 per 100.
- HEDERA maderiensis** (Madeira Ivy). Leaves larger than English Ivy, thick and heavy, fine for ground cover or climbing on trees. 30c. each, \$3.00 for 12.
- LONICERA halliana** (Climbing Honeysuckle). A rampant climber with evergreen foliage and fragrant white flowers, changing to yellow.
- LONICERA sempervirens** (Coral Honeysuckle, Woodbine)). An excellent native vine of fast growth with evergreen foliage and coral-red blooms. Attractively used on fences, pergolas, etc.
- TRACHELOSPERMUM jasminoides** (Rhynchospermum, Star Jasmine). A rapid growing, twining vine of dark, glossy green leaves. It is covered in the Spring with a mass of starry, white flowers of intense and pleasing fragrance.
- VINCA minor** (Periwinkle). A rapid growing vine with dark green leaves and blue flowers. Used extensively as a ground cover, and for trailing from window boxes. 20c. each, \$2.00 per 12, \$15.00 per 100.
- WISTERIA chinensis.** A vine used extensively in the South for covering pergolas and arched-over drives. Long, drooping clusters of fragrant blooms in early Spring. We offer purple and white.

Miscellaneous Plants

These are many plants in coniferous and broad-leaved evergreens, deciduous flowering trees and shrubs, Roses, etc. which we have in too limited quantity to list in this catalog. If you do not see listed in this catalog something you want, it is quite probable we would have it if you write us.

We Will Trade

plants for many items of merchandise. We will trade with store keepers anything from our catalogue for items of clothing, groceries, furniture, hardware, lumber, etc., we can use.

DECIDUOUS TREES

- CERCIS canadensis.** With the first touch of Spring, this native tree bursts into a mass of reddish purple flowers. One of the best early flowering trees.

DECIDUOUS SHRUBS

- | | | | |
|---------------------------|--------|--------|---------|
| | Each | 12 | 100 |
| 1 yr. plants, stocky..... | \$0.25 | \$2.50 | \$20.00 |
| 2 yr. plants, stocky..... | .35 | 3.50 | 30.00 |
| 3 yr. plants, stocky..... | .50 | 5.00 | 40.00 |
- ALTHAEA.** A free flowering shrub or small tree, producing single and double flowers in red, pink, purple, variegated and white abundantly in the Summer.
- AMYGDALUS** (Flowering Almond). A showy small shrub producing an abundance of small double flowers in late Winter. We can supply either the white or pink variety. 2 yr. plants only.
- CALYCANTHUS floridus.** The Sweetshrub of the old fashioned gardens of the South.
- CYDONIA japonica** (Flowering Quince). One of the best of the Winter flowering shrubs. We can supply either the red or pink variety and in 2 yr. and 3 yr. plants only.
- DEUTZIA.** Very showy, Spring flowering shrubs, fine for massing or adapted to natural plantings. We can supply both white and pink.
- EXOCHORDA grandiflora** (Pearlbush). Large, pure white flowers produced in great profusion early in March. When in full bloom the plants have the appearance of a snowbank. Fine for massing.

FORSYTHIA (Goldenbell). Late Winter and early Spring flowering shrubs with golden yellow flowers. We have upright and drooping kinds.

HYDRANGEA otaksa. The fine old Hydrangea, useful and beautiful in southern plantings. In South Georgia the bloom is usually blue, due to existence generally of clay subsoil. To make it pink dig out the clay and fill in with black or sandy soil.

JASMINUM primulinum. A rapid growing shrub producing an abundance of yellow flowers in early Spring. Can be trimmed in shape, or the canes trained up as a climbing shrub.

LONICERA fragrantissima (Upright Bush Honeysuckle). Masses of fragrant white flowers are produced on upright and slightly drooping branches in Winter. An excellent deciduous flowering shrub for using with evergreens.

LAGERSTROEMIA indica (Crape-myrtle). A vigorous, deciduous shrub or small tree, with beautifully fringed flowers in the Summer. The Crape-myrtle is easy to grow, thriving often when given no care for years. Clumps of these trees brighten the roadways here and there in the South. When fitted into landscape plantings they are extremely valuable for their long season of bloom. We have watermelon red, pink, lavender, purple and white.

SPIRAEA. Spiraeas are indispensable for mass or border planting, and are used attractively with evergreens. They bear a profusion of showy white flowers in late Winter and early Spring. We can supply Reevesiana (upright) in single and double flowering; the Vanhouttei (Bridalwreath); Thundergi (dwarf, feathery foliaged); and also the Spiraea Anthony Water, a Summer flowering red kind.

WEIGELA rosea. A vigorous shrub, producing a wealth of showy, bell-shaped flowers in early Spring, color rose-pink. This plant makes an attractive mass for screen planting.

MISCELLANEOUS PLANT MATERIAL

AMARYLLIS vittata (Giant Lily). Flowers very large, range of color wonderful—red, maroon, rose, splashed pink, striped and variegated. The only plant we sell we cannot guarantee the color of, but ours is a good strain, all flowers will be good. Flowering size 75c. each, \$7.50 per 12.

BAMBUSA falcata. The best of the bamboos for ornamental plantings. Fine leaved, compact growing, making growth from one center; does not sprout from roots along the ground. Medium clumps, \$1.00 each, \$10.00 per 12; larger clumps, \$1.50 to \$2.50 each.

CORTADERIA argentea (Pampas Grass). A large, strong growing, grass-like plant, producing big clumps 6 to 8 ft. high with white plumlike flowers. Excellent for screens or individual planting. Strong clumps, \$1.50; extra strong clumps, \$2.50 each.

LIRIOPE graminifolia. A comparatively new border plant that is rapidly coming into favor wherever known. Grasslike leaves, green the year round, and beautiful spikes of purple flowers in the Summer. The best border plant in cultivation in this section. When planted 6 in. apart, will soon make a perfect line. This plant was formerly called Ophiopogon. Our plants are the superior large leaf variety. 1 yr. plants, \$1.00 per 12, \$7.50 per 100; 2 yr. plants, \$1.50 per 12, \$10.00 per 100.

PANSY, Steele's Mastodon and Fitzonka's Prize Strains. Each of these strains is very floriferous and produces mammoth flowers. We can supply good mixed plants or separate color of blue, yellow or white. Pansy plants are ready November 1st and may be set as late as January. 50c. per doz., \$1.50 per 50, \$3.00 per 100, \$20.00 per 1000.

VIOLET. We have large flowering Violet in both dark blue and light blue. \$2.00 per 12.

ROSES

The Rose has justly been termed the "queen of flowers" for its wide range of beautiful colorings, pleasing, fragrance, great variety of form and habit and easy culture. Surely no Southern garden is complete without the Rose, where such a wealth of varieties may be grown, including Teas, which cannot withstand the rigorous northern Winters.

VARIETIES

While there are many varieties that do well in the South, a best dozen may be selected that stand out conspicuously above all others in various localities, even this may be reduced to six, or even three. It is generally agreed that the three Radiance Roses—Radiance, Red Radiance and Mrs. Charles Bell lead.

PRICES OF ROSES

50c. Roses are \$5.00 per 12, \$40.00 per 100

25c. Roses are 3.00 per 12, 22.50 per 100

1-year Roses are half above prices

Hybrid Tea Roses

Betty. Coppery-yellow with shadings of rose; beautiful, long-pointed buds, excellent bloomer. One of the best varieties. 50c.

Countess of Gosford. A Rose from England. Exquisite salmon-pink with delightful shadings of rose; a thrifty grower and profuse bloomer over a large flowering season. One of the best Roses and a variety we always recommend when asked to name the best kinds. 50c.

Dame Edith Helen. Brilliant yet soft Rose du Barri pink; strongly sweet scented; perfect buds developing into flowers of immense size produced singly on well foilaged canes. Baskets of this variety in our exhibit at the last Thomasville Rose Show attracted more favorable attention than any other Rose in the show. 50c.

Duchess of Wellington. Long, shapely buds; color intense saffron yellow; fragrant and free blooming. 50c.

Edward Mawley. Deep crimson, fine Spring bloomer. 50c.

Etoile de France. This Rose is generally considered the best of the dark red Hybrid Teas for this section. Deep, velvety crimson, good bloomer. 50c.

Etoile de Hollande. A strong, vigorous grower and free bloomer, fairly double flowers of brilliant crimson red color. A comparatively new Rose that may supersede Etoile de France. 50c.

Francis Scott Key. Very double, bright red, good bloomer. 50c.

Gruss an Teplitz. One of the most dependable of all red Roses. Deep, velvety crimson; fine bloomer, strong grower. 25c.

Jonkheer J. L. Mock. A great Rose from Holland. Carmine pink outside, imperial pink inside of petals, large flower. A vigorous new Rose. 50c.

Kaiserin Auguste Viktoria. This Rose has long been a great favorite in the South, with its large blooms of creamy white. 50c.

Killarney. One of the finest Roses ever produced. A dependable grower; free bloomer over a long season; especially pretty buds, color varies from pink to deep pink. A great favorite in the South. 25c.

Killarney Brilliant. While this Rose does not bloom quite as freely as its parent, Killarney, it is a Rose of fine color, deepest pink, almost red. 25c.

Killarney Queen. The flowers of this Rose are somewhat larger than Killarney and are of unvarying dark pink throughout a long season of flowering. 25c.

Book: GARDENING IN THE LOWER SOUTH

By H. Harold Hume. Climate, growing conditions, plants and varieties in this region differ from other parts of the country, and this excellent new book fills a long-felt need. Discusses the relation of plants to the climate, and considers soils, fertilizers, garden pests, etc. There are special chapters on Azaleas, Camellias, Roses, Palms, Bulbs, Annuals, etc. Profusely illustrated. Price \$5.00.

Lady Craig. Beautifully shaped buds of canary yellow, developing into large flowers; a good Rose. 50c.

Luxembourg. The best new yellow Rose we've had in our fields in many days. Makes large, beautifully pointed bud, and open flower, is full and compact. A deep golden yellow is the color of this new Rose. 50c.

Mary Nish. The Salmon Radiance. This Rose is a sport from Red Radiance, and on the Pacific Coast, according to its introducers blooms white, shaded shell pink. In the locality of Thomasville, it is always a salmon, not having the shell pink shading of Mrs. Charles Bell, and being quite distinct from the latter. It is a profuse bloomer and valuable member of the Radiance family. 25c.

Mrs. A. R. Waddell. Deep apricot-pink, shading to orange-salmon. The bush is vigorous and free flowering, a satisfactory kind. 50c.

Mrs. Charles Bell. This Rose can best be described as a light pink Radiance, being a sport from that variety. We have had it under observation since its introduction, and we find it equally as good grower and bloomer as its parent Radiance; in fact, it stands conspicuously above most Roses in gardens where it is planted in the Southeast, and it has been a big attraction to visitors to our nurseries. In color it varies from shell pink to salmon pink. 25c.

Mrs. Wakefield Christie-Miller. Soft pearly blush, shaded salmon. The bush is a healthy one and can be depended on for a large crop of flowers. 50c.

National Emblem. One of the finest red Roses ever introduced. Strong grower, free bloomer, deep, rich crimson color. One of the best of all Roses at Thomasville. 50c.

Ophelia. Salmon flesh, shaded Rose, beautiful buds on good stems. An immensely popular Rose. 25c.

President Hoover. An unusual Rose, flame pink, scarlet and yellow. 50c.

Radiance. This is the Rose we unhesitatingly call the best of all varieties, and it is the one in the biggest demand by those who have tried many kinds. In color it is a brilliant rosy-carmine, displaying beautiful opaline pink tints in the open flower. As a cut flower variety Radiance leads the field of outdoor Roses, its nearest competitors being its sports. Its wonderful growth, freedom of bloom and large and shapely buds and full flowers on stiff stems make it a complete success in the South. 25c.

Red Radiance. A sport of Radiance, and of the same freedom of bloom and vigorous growth characteristic of this family. Like Radiance and Mrs. Charles Bell, it is a wonder for blooming in hot weather when most Roses have slowed up. Easily the leading red Rose. 25c.

Rev. F. Page-Roberts. Bud coppery red, opening golden yellow; a Rose of remarkable beauty both in form and color. 50c.

Souv. de H. A. Verschuren. One of the best of the yellow Roses. Golden yellow flowers on strong stems. Does not ball in bud like some other yellows. We recommend this Rose to all who desire a better one of its color. 50c.

Talisman. Brilliant red and gold buds, opening to orange yellow. One of the best of the newer Roses. 25c.

Una Wallace. The finest new Rose we have tested the past several years. Similar to Humboldt, but a clearer pink and more vigorous. The flowers are produced freely on long stems. 50c.

White Killarney. A white sport of the well known Killarney, and a valuable and popular Rose. 25c.

W. C. Gaunt. Brilliant scarlet in color; free bloomer; one of our most beautiful Roses; popular at Thomasville. 50c.

TEA ROSES

- Alexander Hill Gray.** Solid yellow in bud, opening lighter, a vigorous grower, free bloomer. 25c.
- Duchesse de Brabant.** Light rose to shell pink, an excellent grower and bloomer; one of the most popular Roses in the South. 25c.
- Freiherr von Marschall.** One of the best red Roses. A vigorous grower, with long pointed buds and large, full blooms of dark carmine red. 25c.
- Helen Good.** A blush pink sport of Maman Cochet, with the good qualities of its parent. 25c.
- Lady Hillingdon.** Beautiful pointed buds of deep yellow, the favorite of the deep yellow Roses in this section. 25c.
- Maman Cochet.** This is the famous Pink Cochet. Light pink, shaded with bright rose; beautiful, long pointed buds and large and full flower. The most generally popular Tea Rose in America and one that is always a success in the South, giving blooms over a long season. 25c.
- Marie Van Houtte.** Canary-yellow, deeper center, border of petals tipped bright rose. A vigorous grower, profuse bloomer, and a favorite in this section. 25c.
- Minnie Frances.** Dark pink, strong grower and good bloomer; long buds, a Rose on the order of Mme. Lambard. 50c.
- Mlle. Franziska Kruger.** Coppery-yellow, a wonderful bloomer, the best Tea Rose of its color. 25c.
- Mme. Lambard.** Bright, deep rose, variable in color, deepens in tone in the Fall; large, fine form, beautiful buds, strong grower, excellent bloomer. We grow this well known favorite in large quantities because it is always in demand and always satisfactory. No one who has seen the great display of Mme. Lambard Roses on the private estates near Thomasville will ever forget the beauty of the sight. This Rose held first place with us 20 years. It is the best of the Tea Roses. 25c.
- Mme. Melanie Soupert.** A salmon yellow Rose with shadings of pink; a very free bloomer, long pointed buds and large, heavy, double flowers. The plant is vigorous and a consistent bloomer throughout a long season. A Rose we especially recommend. 25c.
- Mrs. B. R. Cant.** Deep rose to light red, flowers somewhat similar to Maman Cochet in form; a wonderful bloomer and an altogether satisfactory Rose. 25c.
- Mrs. Dudley Cross.** In form and blooming qualities it easily passes for what it is often called, a yellow Maman Cochet. It is a yellow Rose, tinged with pink in the same manner as the White Cochet is tinged with pink. One of the best bloomers. 25c.
- Papa Gontier.** Rosy crimson; fine, long pointed buds, a vigorous and altogether excellent Rose. 25c.
- Safrano.** A fine old Tea Rose of bright apricot color and free blooming qualities. It is beautiful in bud and in mild Winters continues to bloom along the Gulf Coast. 25c.
- Snowflake.** A white Rose that is a wonderful bloomer throughout the Rose flowering season. Especially good in the Fall. 25c.
- White Maman Cochet.** A white Rose of the excellent qualities of its parent, Maman Cochet. Edges of petals tipped rose. The best white Tea Rose. 25c.
- William R. Smith (The Blush Rose).** A cross between Maman Cochet and Kaiserin Auguste Viktoria, of lovely blush pink color. Free bloomer, strong grower; long, pointed buds, heavy flowers. 25c.

ROSE LECTURE

The services of S. C. Hjort, a member of the American Rose Society's Committee of Consulting Rosarians, are available to Rose Societies, Garden Clubs, etc. and correspondence is invited.

Hybrid Perpetual Roses

Baroness Rothschild. Delicate shell pink, a chaste and beautiful Rose. A vigorous grower, a good bloomer in its season. 50c.

Duchess of Sutherland. A new Rose of its class which has attracted a lot of attention. Large, shapely buds and fine open flowers of beautiful, peach-pink color. 50c.

Frau Karl Druschki. This grand white Rose, sometimes called White American Beauty, has become renowned as the very highest type of its class and the best snow white Rose ever introduced. It is a strong grower and good bloomer, and its magnificent flowers are nothing less than glorious. It is a true Paper-white, without a tinge of other coloring. 25c.

George Arends. This is one of the most beautiful Roses ever produced, and it will be many days before a variety of its merits can be displaced. It is of delicate pink coloring, and keeps well as a cut flower. Owing to its form it is often called the Pink Frau Karl Druschki. 25c.

Heinrich Munch. Soft pink, very large and full, a fine companion to Paul Neyron and Frau Karl Druschki. 50c.

Hugh Dickson. Large crimson red, full and double; rank grower. 50c.

J. B. Clark. At Thomasville this is the most popular of all the red Hybrid Perpetual Roses. Intense crimson flowers, free and strong. Always forms a strong showing at the Rose Show. 25c.

King George V. A wonderful new English Hybrid Perpetual Rose, our favorite of the reds. Immense, with double flowers of dark, velvety crimson; destined to become popular in this section along with Paul Neyron and Frau Karl Druschki. 25c.

Paul Neyron. Really too well known to require a description. We can recommend it to anyone who wishes to plant hybrid Roses; it is a dependable grower and bloomer in the South. It is the largest Rose known; deep, rosy pink, full flower, fragrant. 25c.

Ulrich Brunner. Deep red in color, large flowers; often called the Red Paul Neyron, because flower is of same form. 25c.

Dwarf Polyantha (Baby) Roses

Chatillon Rose. Shell pink, small double flowers, excellent bloomer, and has come to be known as one of the best pink Polyanthas. 25c.

Cathrine Zeimet. Small double, pure white flowers, produced in profusion; the best of the white baby Roses. 25c.

Erna Teschendorff. Deep red, double, free flowering. 25c.

La Marne. Semi-double, light pink flowers, good bloomer. 25c.

Mlle. Cecile Brunner. The well known and beloved "Sweetheart" Rose of the South. Small, double, blush pink flowers; borne in clusters. 50c.

Miss Edith Cavell. Small, semi-double flowers of brilliant scarlet-red, produced in compact corymbs on sturdy, small branches. It is a profuse bloomer, and is easily the most popular baby Rose used about Thomasville. 25c.

Orleans. Cerise red and white center, a showy and satisfactory baby Rose. 25c.

Pink Orleans. A comparatively new baby Rose of delightful rose pink coloring; a profuse bloomer. 25c.

Book: WHAT EVERY ROSE GROWER SHOULD KNOW

(Official Handbook of American Rose Society)

This is a very practical book. It tells about Roses and how to grow them in the simplest fashion and the fewest words. It is expressly designed to help the beginner and gardener who wants to know how to grow Roses successfully. Numerous drawings make each operation clear. Price \$1.00 postpaid.

Climbing Roses

- Bauty of Glazenwood.** Orange yellow with reddish tints; a good climbing Rose. Also known as Gold of Ophir and Fortune's Double Yellow. 50c.
- Cherokee.** A vigorous climber with single white flowers which appear in earliest Spring. A well known Rose for this section. 50c.
- Cloth of Gold.** Sulphur yellow, deeper center; large and full. 50c.
- Cl. Lady Ashtown.** Soft rose colored blooms; a good Rose. 50c.
- Cl. Killarney.** A climbing Rose in much favor at Thomasville. Flowers like bush Killarney; a good bloomer; vigorous. 25c.
- Cl. Malmaison.** A very vigorous and free blooming bush pink; a popular and satisfactory climbing Rose. 50c.
- Cl. Maman Cochet.** A pink climber of sterling qualities, identical in color with the bush Maman Cochet. 25c.
- Cl. Mrs. Aaron Ward.** Those who did not succeed with the bush Mrs. Aaron Ward are offered this more vigorous Rose; a good yellow. 50c.
- Cl. Mrs. Charles Bell.** A fine new climbing Rose which originated on the Hjort grounds. Exactly like bush form in color, is good bloomer and fast grower. 50c.
- Cl. Perle des Jardins.** One of the best of the yellow climbers, preferred by some to Marechal Neil, which it resembles. 50c.
- Cl. Radiance.** A fine new climber, developed from the bush Radiance. Identical in color with the parent, and destined to become extensively used in this section. 25c.
- Cl. Red Radiance.** This is one of the best Roses we have ever seen, a vigorous climber, identical in color with the bush variety. Anyone who plants climbing Roses will do well to include this one, as it is going to become a great favorite when it is better known. 25c.
- Cl. White Cochet.** A most dependable white climbing Rose, used extensively in this section. Large, shapely buds and flowers, like the bush form. 25c.
- Cl. White Killarney.** A very good white climbing Rose. 25c.
- Marechal Neil.** The famous old yellow climber of the South. When well grown it is the best Rose of its color. Give it a little extra care and you will be rewarded with glorious blooms. 50c.
- Pillar of Gold.** Deep yellow center, very double. 50c.
- Pink Cherokee.** Glowing, single pink flowers, shaped like the White Cherokee. 50c.
- Red Cherokee.** A red climber, developed from the pink variety. 50c.
- Reine Marie Henriette.** For many years this was considered the best of the red climbers, and is still immensely popular. 25c.
- Reve d'Or.** At Thomasville this is the favorite of the yellow climbing Roses where many kinds have been tried. Fine bloomer; of good foliage. 25c.
- William Allen Richardson.** Deep orange yellow, medium sized flowers borne in profusion. 50c.
- Yellow Banksia.** A unique and truly great Rose, a distinctively Southern variety not adapted to growing in the North. In the South it grows to perfection, has been known to climb rather tall trees. It is usually the earliest Rose to come into bloom, producing a great mass of small, double sulphur yellow flowers. It should be planted in every Southern garden that has a place for climbers. 25c.

Miami, Fla., Sept. 24, 1932.

Please send me a book on general Rose culture. The Radiance roses you sold me last October are six feet tall and the most gigantic stems I ever saw. I will get more Roses from you in October. W. B. P.

PILLAR ROSES

American Pillar. Rich, rosy pink to brilliant carmine, with a little white in center; semi-double, long stems. One of the best climbing or pillar roses; vigorous plant, glossy foliage, profuse bloomer. 25c.

Cl. American Beauty. This rose produces an abundance of carmine-red flowers, and its shiny foliage adds to its beauty. 25c.

Dorothy Perkins. Beautiful deep pink, flowers borne in large clusters of small, double blooms, sweet scented; fine for use on fences or trellis. In sections where mildew has developed, dust this rose with lime sulphur to control the disease. 25c.

Dr. Huey. Semi-double flowers of the deepest scarlet borne in large clusters, never fades blue. This rose trained as a climber or pillar rose is very showy. 25c.

Dr. Van Fleet. This is one of the most beautiful roses ever introduced. The plant is vigorous, makes a good climber or pillar rose. Flesh pink. 25c.

Mary Lovett. This rose is like Dr. Van Fleet and Cl. American Beauty, except that it is pure white. 25c.

Mary Wallace. An excellent Rose in the class of Paul's Scarlet and Dr. Van Fleet. A deep pink, better color than former pink Roses in this class. Gives a great profusion of bloom in the Spring. 25c.

Paul's Scarlet Climber. One of the most brilliant roses ever introduced because of its clear, vivid, shining scarlet, in large, semi-double flowers which remain unusually long, and in good condition on the plants. These flowers retain their intense coloring until they fall. This rose may be used as a climber, or trained up as a strikingly effective pillar or archway rose. We recommend it highly. 25c.

Red Dorothy Perkins. It is a good deal to claim for a rose, but we are within bounds when we describe Red Dorothy Perkins, or Excelsa, as a brilliant Crimson Rambler on glossy, varnished, Wichuraiana foliage. In certain sections where mildew has developed, this rose, like the pink variety, should be dusted with lime sulphur as a control measure. 25c.

Silver Moon. Flowers very large, pure white, semi-double, petals of green substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in center adds to its attractiveness. A vigorous climbing or pillar variety. 25c.

White Dorothy Perkins. A true Dorothy Perkins of glistening white color. 25c.

Miscellaneous Roses

Rosa Hugonis. A single yellow species from China: throws long, half-climbing branches covered with single flowers. It is one of the most strikingly showy Roses ever introduced and thrives in this section. A very early bloomer. 25c.

Louis Philippe (Bengal). Deep crimson flowers and shiny foliage. An excellent Fall and Winter bloomer, and makes one of the best hedge Roses. 25c.

IRRIGATION EQUIPMENT

We carry in stock a complete line of automatic irrigation equipment, including portable rainmaking wagon, and many devices for attaching to hose. Write for information, stating your needs, and we will be glad to quote, or send a member of our sales department to give a demonstration.

FRUIT TREES

While for many years our business was strictly the growing of ornamental plants, in the past few years we have developed a stock of fruit trees and we now offer a fine lot of well grown trees.

Prices of all Fruit Trees on this page

	Each	12	100
2 to 3 ft.....	\$0.35	\$3.50	\$25.00
3 to 4 ft.....	.50	5.00	40.00

FIGS

Brown Turkey. Large, yellowish brown, of fine quality. Does not crack in rainy weather like other figs.
Brunswick. Large, purplish black, good quality, early bearer; a favorite.
Celeste. A small fig of fine flavor, highly valued for canning. An extremely hardy variety, can be grown over a wide territory. It is by long odds the favorite kind in the Southeast. Sometimes called Brown Sugar Fig.
Green Ischia. A variety of fine quality, fruit of medium size, greenish-white, tree a strong grower.
Lemon. A very large fig of yellowish-green color flavor good. It is next to Celeste in popularity in this section.

PEARS

Kieffer Pear. A fine variety for canning and preserving. It is a regular bearer in the Southeast, blighting very little most seasons. Fruit large, yellow with reddish cheek. August.
Le Conte Pear. An early variety of fine quality, valued for eating when properly ripened. Large, pyriform fruit, pale yellow. July.
Pineapple Pear. The favorite variety in the Southeast, owing to its great resistance to blight. Not of as good eating quality as Le Conte, but better than Kieffer, and unexcelled for canning. July-August.
We can supply Pineapple Pears, 4 to 6 ft. at 50c each, \$5.00 per 12.

PLUMS

Excelsior Plum. We have found this variety, a hybrid, which originated in north Florida, to be the best kind for this section. Fruit large, purplish red, skin thin, flesh firm and juicy, of excellent flavor. Ripens early, about June 10th. Tree is very vigorous and a prolific bearer.

CITRUS FRUITS

Our Citrus fruits are budded on Citrus trifoliata, the hardiest of all stocks.
Owari Satsuma Orange. The hardiest of all Oranges, belonging to the Tangerine family, and a regular and very prolific bearer of deep, orange colored fruits. The best strain of Satsuma Orange is the Owari.
1-yr. buds on 2-yr.

	Each	12	100
stocks	\$0.50	\$5.00	\$40.00
Kumquat. The Kumquats are small Citrus trees, often called bushes, and are extremely hardy. Kumquats in this section stood temperatures down to 10 degrees Fahrenheit in the severe freeze in January, 1924. Two kinds are in general commerce, the Nagami (oblong), and the Marumi (round). Both			

PEACHES

Belle of Georgia. Large fruit, skin white with red cheek, flesh white, quality excellent, prolific variety. July.
Carman. Size large, yellow with red cheek, flesh yellow, quality excellent, prolific and dependable. June.
Elberta. Fruit very large, yellow with red cheek, flesh yellow, flavor excellent, a choice variety. July.
Early Elberta. Just what the name implies. June.
Greensboro. Large and showy, skin bright yellow with red cheek, flesh juicy and of fine quality, semi-cling variety. An excellent kind for general planting. June.
Hiley. An early Belle of Georgia. June.
Jewel. A great favorite in Florida. Medium, oblong, highly colored, red outside, flesh yellow, finest quality. Last of May.
Mayflower. A large, red cling Peach of good quality. The earliest variety. May.

PERSIMMONS

Tamopan. Fruit large, rounded-flattened, oddly marked by constriction around, quality very good. Tree a vigorous grower, bears well, does not require pollination from other varieties to fruit. September.
Tane-Nashi. Fruit very large, roundish-conical in shape, flesh seedless, quality good, variety prolific, the most desirable market kind. Self pollinating. September.
Triumph. A heavy bearer of medium sized fruits of the very best quality; a most desirable variety for home use. Self-pollinating. October.
We have a limited quantity of other Persimmons, **Fuyugaki, Okame, Yemon, Hyakume, and Gailey**, at no increase in price.

are extremely heavy producers of small golden yellow fruits, rather too well-known to need description.
Duncan Grapefruit. The hardiest variety. Many trees of this kind have stood the Winters of south Georgia a long time without serious injury. The fruit is medium to large, of fine quality, and is a heavy bearer.

Prices of Kumquats, Grape Fruit

	Each	12	100
1-yr. buds on 2-yr.			
stocks	\$0.75	\$7.50	\$60.00
2-yr. buds on 3-yr.			
stocks	1.50	15.00	100.00
We cannot ship Citrus trees into Florida; the law prohibits their entry. We can ship anything else into Florida, using Florida permit tags.			

PECANS

GRAPES

Frotscher. Oblong nut, large, shell very thin, cracking easily, kernels large, full and easily removed, good quality. Tree of spreading habit, thrifty growth. A favorite in south Georgia.

Moneymaker. A medium, rounded-oblong nut, good cracking quality, kernel full, flavor good. This variety is a heavy bearer, and the one Pecan never known to be effected with scab disease.

Schley. Oblong nut, large, very thin shelled, fills well, kernel plump, quality the best of all Pecans, fair bearer. For home plantings, where the highest quality is desired, it is especially recommended.

Stuart. Large nut, oblong, fills out well shell medium, quality good. Prolific and succeeds over a large area.

Success. Size large, oblong, tapering at apex, shell thin, cracks well, kernel large and full, quality very good. Tree vigorous, a good variety.

Prices of Pecans:			
	Each	12	100
4 to 5 ft.....	\$1.00	\$10.00	\$80.00
5 to 6 ft.....	1.25	12.50	100.00
6 to 8 ft.....	1.50	15.00	125.00

Carman. A vigorous and prolific bunch Grape, resistant to disease. Medium size, black, finest quality.

Concord. A blue-black bunch variety; sweet, pulpy, tender, quality good. Vigorous grower, prolific, berries large.

Delaware. A heavy bearing bunch variety, berries medium size, red when fully ripe, finest quality.

Niagara. A good market bunch variety, berries white, large and of good quality.

Scuppernong. The most popular of the Southern Muscadine class. Berries large, 8 to 10 in cluster, color brown when ripe, flesh pulpy, very vinous, sweet. Vine is free from diseases and insect depredations. Very prolific bearer. Commonly called the White Scuppernong.

Thomas. Another member of the Southern Muscadine class, sometimes erroneously called the "Black Scuppernong." Large clusters of 6 to 10 berries. Violet to black when ripe, large, sweet, prolific. Free from disease.

Strong Plants:			
	Each	12	
2 yr.....	\$0.50	\$5.00	
1 yr.....	.35	3.50	

Spray and Dust Materials

Three Scientific Sprays for Roses, etc.
All of these sprays are complete; merely add water and use according to directions.

APHISTROGEN			
Kills Aphids or Plant Lice Invisible			
2 ozs.....	\$0.50	½ lb.....	\$1.25
		Lb.....	\$2.25
INSECTROGEN			
Destroys Most Leaf Chewing Insects			
4 ozs.....	\$0.60	½ pint.....	\$1.00
		Pint.....	\$1.75
FUNGTROGEN			
For Mildew and Black Spot Invisible			
½ pint.....	\$0.75	Pint.....	\$1.25
		Quart.....	\$2.00

Aphistrogen quickly rids Roses and other plants of aphids, tiny green lice that appear in early Spring.

Insectrogen kills insects eating the smallest particle of the sprayed leaf.

In gardens where Fungtrogen and its companion sprays are regularly used, brown canker is unknown.

MASTER-FOG SPRAYER
An excellent large capacity hand sprayer which will properly vaporize insecticides. This is a well built, durable, one-quart sprayer. Price \$1.00.

DESTRUXOL EMULSION
A contact and fumigating spray for sucking and chewing insects, scale, mildew, blight and rust. A powerful insecticide we use continually. Will kill the worst scale without burning tender foliage of plants. We use it continually on small and valuable plants, being the only high powered insecticide we have tested that will not burn. Use 1 part Destruxol Emulsion to 50 parts water.

1 quart can \$1.25.

MOLOGEN — MOLE KILLER
Here we have a preparation which destroys one of the worst garden enemies. Mologen eliminates moles from the lawn or garden in 2 or 3 days. Non poisonous to humans and pets. ½ lb. can 50c., 5 lb. can \$4.00.

DUST WITH POMO-GREEN
The Leaf Green Dust
An Easy, Effective Way to
PROTECT YOUR ROSES
and other Flowering Plants against Insects and Fungous Diseases
without making the treatment conspicuous

Dusting with "leaf green" Pomo-Green is the protective method used by experts. Best for your garden too. Pomo-Green is the celebrated Massey Dust made more toxic and colored green. **Roses.** Black spot, mildew or chewing insects are bound to appear. Pomo-Green prevents and controls these insects and diseases quickly and effectively. Protect new growth by dusting with Pomo-Green once each week throughout the growing season.

Lb. can.....	\$0.50	5 lb. carton.....	\$2.00
--------------	--------	-------------------	--------

NIAGARA "PINT" DUSTER
The Niagara "Pint" Duster is the ideal duster for small vegetable and flower gardens, shrubs and small fruit. It is light, sturdy and operates easily. Price \$1.00.

Black Leaf 40. A nicotine sulphate preparation for destroying aphids, thrips, etc. Full directions on each package. 1 oz. bottle 35c., ½ lb. \$1.50.

Manganar Rose Dust. An efficient preventative for Black Spot, Brown Canker, Mildew and an efficient control for leaf-eating insects. In the American Rose Society's tests at Cornell University the most efficient dusting preparation. 1 lb. can 50c, 5 lb. carton \$2.00.

SACKS WANTED
We use great quantities of burlap and sacks for wrapping plants and will be glad to exchange plants for them.

The Thomasville Rose Show

The Rose pilgrimage to Thomasville every Spring has become an event of great importance in the Southeast. Thomasville, "The City of Roses," has staged 11 wonderful and successful Rose shows, and plans are under way for "The City of Roses' Greatest Rose Show" to be held Friday, April 28, 1933.

The weather in late April is usually fair, and many paved and improved roads lead to Thomasville. While there are many strikingly beautiful displays of Roses, there are also brilliant arrangements of Sweet Peas, Larkspurs, Annuals, Potted Plants, etc.

All of this wealth of beauty is yours to view without any admission charge. Make your plans to come to the Thomasville Rose Show. And while you are in Thomasville, we invite you to drive through our Rose fields, where may be seen many Rose varieties in bloom. We really have a Rose show of our own from April till frost.

If you miss an acquaintance with the Roses of Thomasville, you miss a delightful experience.

FERTILIZER MATERIALS

BLOOM AID

BloomAid is a high grade fertilizer for hungry plants, prepared especially for the full nourishment of flowers, shrubs, vegetables, trees. It is rich in the elements they need for growth, carefully blended in proportions of nitrogen, phosphoric acid and potash for developing stalk, leaf and bloom. We use BloomAid continually, have found it satisfactory and recommend it. Directions for use with each package. 5 lb. can 50c., 25 lb. sack \$1.50; 50 lb. sack \$2.50; 100 lb. sack 4.00.

"TORFMULL" PEAT MOSS

"Torfmull" Peat Moss. Many plant failures have been due to a lack of humus in the soil. This has been supplied in the past by stable manure containing straw and leaves. Often in cities this cannot be obtained and when available is full of nut grass and weed pests. Peat Moss, with which may be used commercial fertilizer fills this requirement. Peat Moss alone, or with some cottonseed meal, serves as mulch fertilizer for Azaleas and is valuable for all kinds of shrubs. When used as a mulch, its capacity to absorb 18 times its weight in water prevents soil becoming dry for long periods during excessively dry weather. We use it continually and extensively in our plant growing and we unhesitatingly recommend it. It is entirely free from pests and will not injure any plants even if used very freely. 14 lb. Garden Club package \$1.00, 180 lb. bale \$4.00.

GARDENING WITH PEAT MOSS

Many gardening failures are due to poor soil conditions. Two problems are involved in the fertilizing of the land: the direct addition of plant food and the improvement of the physical structure of the soil. The latter is often the more important. The addition of humus makes the land mellow, friable, retentive of moisture, and promotes the general chemical activities of the soil. In the past, humus has been usually supplied through the use of cow lot manure where straw and leaves had been used in the bedding. Often, especially in the cities, this is difficult to obtain and if available is full of pests, such as nut grass and weed and grass seeds. Peat Moss is free of pests and everywhere gardeners who use it are enthusiastic over its soil building qualities.

Gardening with Peat Moss is a valuable book, telling how to use Peat Moss in all conditions. It is profusely illustrated and one of the most helpful books a gardener could obtain. Price \$1.00 post-paid.

Vigoro is a scientifically balanced and complete high grade fertilizer for trees, shrubs, flowers, vegetables, etc. It is the most extensively used high grade plant food in this section. It comes packed in heavy white paper lined bags in convenient sizes, making it possible to keep a supply on hand at all times for the feeding of plants at regular and frequent intervals. Directions for use with each package. 5 lb. can. 50c., 25 lb. bag \$1.50, 50 lb. sack \$2.50, 100 lb. sack \$4.00.

Columbus, Ga., Sept 17, 1932.

We would also take pleasure in saying that we bought all of our Camellias from you in April, they are just about double in size, and are lovely plants.
